

Pre-AP Chemistry/Chemistry I
Unit #5—Bonding

Homework Part III

Lewis Structures for Type III Binary Molecular Compounds and Binary Acids—Polar Covalent with Double Bonds and Resonance Structures

Carbon Dioxide, CO ₂	Sulfur Trioxide, SO ₃
---------------------------------	----------------------------------

Lewis Structures for Type III Binary Molecular Compounds and Binary Acids—Polar Covalent with Triple Bonds and Resonance Structures

Ethyne, C ₂ H ₂	Dicarbon Difluoride, C ₂ F ₂
---------------------------------------	----------------------------------------------------
